Dear sir/madam,

Subject: Requisition to construct college building (class rooms and laboratories) Govt. PU college, Rajanukunte, Bangalore under CSR fund.

Ref: Recommendation of BDA chairman and MLA S R Vishwanath sir

At Government PU College, Rajanakunte, Bangalore North, we focus on providing students with the best education possible. This college is situated at semi urban area and started recently (2020-2021 academic year). At present 425 students have taken the admission in the college and most of them are from rural area and very poor family. Although this college is supported by the Government of Karnataka, due to awful budget shortfall no funds are available to construct required number of class rooms and laboratories. Of course, none this would be possible without the generous support from persons like you and your company. We would greatly appreciate it if you construct **class rooms and laboratories** to our college under CSR fund. So, I request personally and behalf of college betterment committee to construct the following requirements of rooms and laboratories (Approved plan already submitted through MLA Vishvanath sir).

Principal chamber	1
Staff room	1
Computer laboratory	1
Class rooms	10
Toilets (Boys and girls separately)	

With regards

Yours sincerely

PRINCIPAL
Government P.U. College
Rajanukunte, Bangalore-64.

Challenges

At Embassy, our Government School Infrastructure initiatives aim to create schools that are structurally safe, with adequate toilets, Solar power, Rainwater Harvesting and furniture that are necessary to increase attendance & learning outcomes for students.

A lack of basic school infrastructure including clean toilets, electricity and safe drinking water

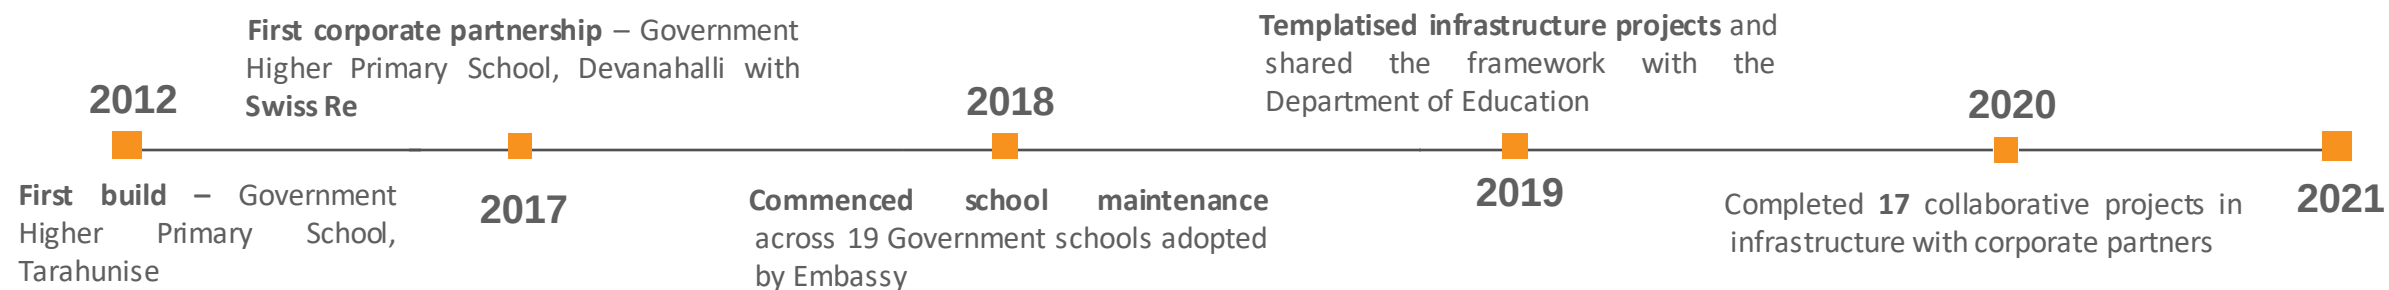

Overcrowded and dilapidated classrooms with insufficient furniture and proper lighting

Poor school performance due to an environment that is not conducive to learning
